

essenza.
SecurityDoor

Essenza Security Door è una linea di portoncini d'ingresso blindati, realizzati a regola d'arte, sempre con un occhio particolare all'estetica, alla funzionalità e nondimeno alla qualità.

Costruiti con telaio, struttura anta con guscio esterno in acciaio, dotati di serrature con trappola di resistenza all'estrazione, piastra antitrapano e di cerniere con rostri antistrappo per garantirvi una miglior sicurezza.

L'anta è protetta da materiale isolante, dotata di guarnizioni in gomma coestrusa e lama antispifferi.

Inoltre, per soddisfare qualsiasi esigenza proponiamo una vasta scelta di pannellature in legno, in alluminio e in PVC declinati in svariati modelli, colori ed essenze.

SISTEMI DI CHIUSURA

Serratura predisposta per cilindro a profilo europeo dotata di trappola di resistenza all'estrazione e di piastra antitrapano, con protector in acciaio carbonitrurato. Tutte le serrature sono racchiuse in una speciale struttura in acciaio da 1,5 mm di spessore e sono dotate di limitatore di apertura

CERNIERE

Perno a sfera da 14 mm su ali ad alta resistenza, uniti alle quali diversi speciali rostri antistrappo, distribuiti sull'altezza dell'anta, impediscono lo scardinamento dell'anta.

SEZIONI

Anta completamente protetta da diversi strati di materiale isolante, guarnita perimetralmente da un profilo in gomma coestrusa e dotata, di serie, di lama antispifferi regolabile, telaio dotato di serie di guarnizione di battuta specificatamente concepita e di tutti gli accessori di finitura.

DOTAZIONI DI SERIE

- Pannello nobil wood
- Maniglie rosetta tonda
argento - bronzo - ottone lucido

MANIGLIERIA A RICHIESTA

- Maniglia rosetta quadra
cromo lucida - cromo satinata
- Maniglione quadro o tondo cm. 50
cromo lucido - cromo satinato

MISURE STANDARD DISPONIBILI

- cm. 80x210
- cm. 85x210
- cm. 90x210

A RICHIESTA

- con sopra luce cm. 240 h - cm. 250 h
- con riscontro elettrico
- kit tenuta aria/acqua/vento

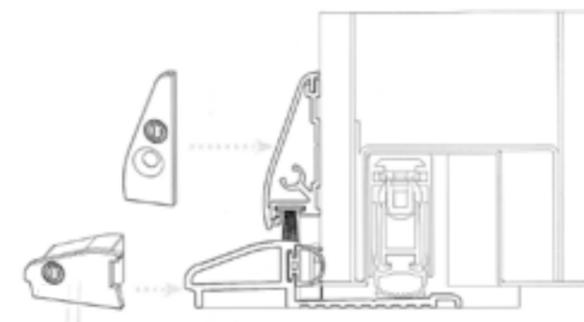

KIT TENUTA ARIA/ACQUA/VENTO

All'aria: classe 3
All'acqua: 9A
Al vento: C5
(in fase di certificazione)

Il kit di tenuta è una soglia a pavimento che protegge da aria, acqua, vento, insetti e rumore le porte a battente con apertura verso l'interno.

Il profilo della soglia è alto solamente 15 mm. e soddisfa tutte le specifiche di tutte le normative europee in materia di barriere architettoniche.

Il drenaggio dell'acqua verso l'esterno è completato da un gocciolatoio da installare sulla porta con viti a scomparsa.

mod. Ezero
